

Weebly Web Page Tutorial

Instructions below are also on www.lamoehr.com

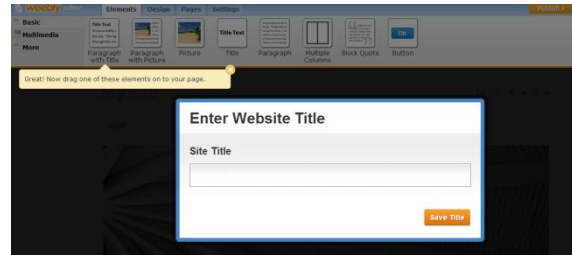

STEP ONE

Go to students.weebly.com

Use username & password provided from your instructor.

STEP TWO

Name your web page using your assigned topic.

STEP THREE

Choose your design

STEP FOUR

Click on "Pages," "Add Page," and then "Standard Page" to create a page for main topic required by your assignment, including a cited sources page.

- Cited Sources (www.bibme.com)

Content will save automatically but will not show on public web page until you "Publish"- see Step 5

STEP FIVE

- Create your Weebly page that describes your research . . . BE CREATIVE!
- Use the different elements to make your page as informative and user friendly as possible
 - Include links to recipes, videos, and have plenty of graphics, including the graphic that will be your page header.
 - Refer to the grading sheet as you develop your web page.
- Click on the "**Publish**" button to make your site available for viewing
